

## CapMx® Spring 2011 Release: *Browse Our Enhancements*

At SVB Analytics, we are always looking for ways to enhance the user experience. Effective March 25<sup>th</sup>, CapMx has been upgraded and reflects the following notable changes.

### Key Features

#### Multi-Browser Support

*Browse your way.*

CapMx introduces enhanced operating system and browser support. You now have access to CapMx using Windows XP Professional, Windows Vista Business, Windows 7 Professional, and Mac OS X 10.6. You also have the flexibility to utilize CapMx via IE 6, IE 7, IE 8, Firefox 3.6, Chrome 4, and Safari 4.

Browser support for Explorer, Firefox, Safari, and Chrome

The enhancements to operating system and browser support are available for both the Corporate Administration and Participant View sites.

#### Enhanced Capitalization Reporting

*Your outstanding shares, your report, your way.*

Sometimes you'd like a current view into your ownership details, so showing your outstanding capitalization on an as-converted basis isn't the way you want to analyze your equity structure. Need to generate outstanding shares on an as-issued basis? How about on a combined as-issued and as-converted basis? We enhanced CapMx's Detailed Capitalization Report so that you control the presentation of your company's detailed capitalization.

Generate and print as-issued and as-converted cap reports

### We Heard You – So Keep the Feedback Coming!

Your input guides our evolution. Please feel free to email your Account Representative with questions, comments, and insights. Detailed release notes are located on the CapMx homepage. Be sure to refer to CapMx Online Help before using these new features.
