

Help your life sciences business thrive internationally

SVB is the only partner you need to move money rapidly across borders, adapt to changes in the world economy and be confident in your decisions.

We get it done

You do the research, we'll do the rest. We have partnered with life sciences and healthcare companies for more than 30 years and understand your specific needs. Our team works closely with you to help protect your cash flow, manage international payables and receivables, support your expansion and minimize currency risk.

Talk to us if you are . . .

- 1 Negotiating contracts with a clinical research organization for overseas trials.
- 2 Structuring an international manufacturing deal.
- 3 Establishing an international subsidiary.
- 4 Expecting funding from an international investor or partnership.
- 5 Protecting your receivables from currency depreciation.
- 6 Paying overseas employees.
- 7 Agreeing to foreign licensing.

Did you know?

48% of clinical trials currently take place outside the US*

*Represents number of registered studies by location as of February 10, 2019, from www.clinicaltrials.gov, U.S. National Library of Medicine.

**Based on NVCA data, 2018. SVB data as of 12.31.18.

Foreign exchange transactions can be highly risky, and losses may occur in short periods of time if there is an adverse movement of exchange rates. Exchange rates can be highly volatile and are impacted by numerous economic, political and social factors as well as supply and demand and governmental intervention, control and adjustments. Investments in financial instruments carry significant risk, including the possible loss of the principal amount invested. Before entering any foreign exchange transaction, you should obtain advice from your own tax, financial, legal and other advisors and only make investment decisions on the basis of your own objectives, experience and resources.
