

UK Interest Rates

An explanation of the method used to calculate final interest rates that apply to the interest bearing accounts that you hold with the UK Branch of Silicon Valley Bank is available at <https://www.svb.com/uk/client-service/uk-interest-rates/>. The interest rate is calculated by adding the Margin Rate applicable to the relevant currency to the Index Rate. If the interest rate is less than 0% then an interest rate of 0% will be applied, unless a Deposit Interest Charge applies (See Section C). The calculation method for payment of interest on credit and debit balances depends on the currency of the account. For the following currencies, we will calculate interest daily over a 360 day year: Australian Dollar, Canadian Dollar, Danish Krone, Euro, Israeli Shekel, Japanese Yen, Norwegian Krone, New Zealand Dollar, Swedish Krona, Swiss Franc and United States Dollar. For the following currencies, we will calculate interest daily over a 365 day year: Chinese Renminbi, Great Britain Pound, Hong Kong Dollar, Singapore Dollar and South African Rand.

SECTION A – STERLING CURRENT PLUS ACCOUNT

CURRENCY		INDEX RATE	MARGIN	INTEREST RATE
BRITISH POUND	GBP	0.75%	-2.00%	0.00%

GBP-denominated Current Plus Accounts are the only current accounts which may pay interest. All other current accounts are non-interest bearing.

SECTION B – CORPORATE DEPOSIT ACCOUNTS

Credit balances in the following currencies will incur a Deposit Interest Charge if the credit balances exceed designated thresholds: Swiss Franc, Danish Krone, European Union Euro, Japanese Yen and Swedish Krona. See Section C for more details.
